CMP 756 Swarm Systems Homework 2

Ready-to-run simulation code is "CMP756_AhmetBurakKOC_HW2.m"

Q1,Q2,Q3 and **Q4** are answered within displays and comments. Validation are done both by,

- Equating variance to 0, which means there is no variation in data with time.
- and by simulation.

Q5 is plotted on figure 2("states vs time")
Q6 is commented
Q7 figures are given below.

Figure 1: centroid vs time

*Figure 2: states vs time*

Figure 3: relative distances to centroid vs time
